

TECHINICAL SKILLS

- ❖ C, C++, Python
- ❖ HTML, CSS, Javascript
- ❖ MySQL, SQLite

EDUCATION

- ❖ B.E in Computer Science – (CY) | R.V College of Engineering *CGPA: 7.27 | 2026*
- ❖ JEE – Mains *91.03 percentile*
- ❖ X (CBSE) | National Centre For Excellence *88% | 2020*
- ❖ XII (CBSE) | National Centre For Excellence *80% | 2022*

EXPERIENCE

- ❖ **Intern | Caze Labs** **(9/2023 - 10/2023)**

At Caze Labs, I built a strong foundation in cybersecurity fundamentals, exploring threats, vulnerabilities, and attack vectors while gaining hands-on exposure to real-world security workflows. I installed and ran Ollama locally to explore LLMs like LLaMA2 and Mistral, developing prompt engineering skills for security-focused automation and vulnerability analysis. This experience strengthened my understanding of how AI can support cybersecurity research and practical defensive strategies.

- ❖ **Intern | Supercraft3D Wellness Pvt Ltd** **(10/2023 – 11/2023)**

Gained hands-on exposure to CAED tools for designing patient-specific medical implants, assisted in preparing and optimizing 3D models for additive manufacturing using CT/MRI scan data, and observed as well as supported the operation of 3D printing devices for medical-grade models and implants.

ACADEMIC PROJECTS

- ❖ **SQL Injection Detection & Prevention for an E-Shopping System**

Developed a Python-based e-shopping portal with a Custom Tkinter GUI and an SQLite backend, featuring dual operational modes — Safe Mode (blocks SQL injection attempts) and Vulnerable Mode (allows database manipulation for testing). Implemented real-time SQL query monitoring, detection, and logging to demonstrate security risks and prevention methods. Designed a product database with search and purchase functionality to simulate a complete shopping workflow.

- ❖ **Cryptography-Based Anonymous Group Messaging Tool with Admin Decryption**

Developed a secure group messaging system using Python and Custom Tkinter, implementing end-to-end encryption via Fernet. Added GUI-based group manager for member handling and an admin-only trace tool to decrypt anonymous messages. Ensured intra-group encrypted communication with message logging and sender traceability.

CERTIFICATIONS

- ❖ NPTEL - Data Science for Engineers
- ❖ NPTEL - Introduction to Soft Computing

LANGUAGES

- English, Kannada, Hindi
