

EDUCATION

- **R.V College of Engineering** Bengaluru, India
B.E in Computer Science (Cyber Security); CGPA: 7.27
Expected 2026
- X (CBSE), National Centre For Excellence – 88% (2020)
- XII (CBSE), National Centre For Excellence – 80% (2022)

EXPERIENCE

- **Intern – Caze Labs** Bengaluru, India
Cybersecurity Intern
Sep 2025 – Oct 2025
 - Performed vulnerability assessment and analyzed system behavior under simulated cyber threats.
 - Used LLaMA2 and Mistral via Ollama to generate cybersecurity insights through AI-driven prompt testing.
 - Evaluated AI-generated reports for usefulness in risk analysis and threat documentation.
 - Gained hands-on understanding of threat modeling and AI-assisted security analysis.
- **Intern – Echelon Marketing House** Bengaluru, India
Marketing Intern
Jun 2024 – Jul 2024
 - Helped design business growth strategies focused on improving client reach and sales.
 - Created and managed social media content to enhance brand awareness and engagement.
 - Conducted customer and competitor research to support data-driven marketing decisions.
 - Supported execution of promotional campaigns that improved audience interaction and outreach.

ACADEMIC PROJECTS

- **SQL Injection Detection & Prevention for E-Shopping System**
 - Developed a web-based e-shopping platform using HTML, CSS, JavaScript, and SQLite to demonstrate SQL security concepts.
 - Implemented a Safe Mode using parameterized queries and input validation to block SQL injection attacks.
 - Created a Vulnerable Mode that intentionally allows unsafe SQL execution for live attack demonstrations.
 - Added real-time query monitoring and logging to highlight malicious attempts and their impact.
- **Plant Disease Detection using CNN & Deep Learning**
 - Trained a CNN model using TensorFlow and Keras on plant leaf disease datasets for image classification.
 - Built a Streamlit-based interface for real-time prediction from uploaded plant leaf images.
 - Used OpenCV for image preprocessing and exported the trained model as `plant_disease_model.h5`.
 - Organized the system into separate components for model training, deployment, and frontend interaction.

SKILLS

- **Programming:** C, C++, Python
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL, SQLite, NoSQL
- **Tools & Libraries:** pandas, NumPy, OpenCV, Matplotlib
- **Certifications:** NPTEL – Data Science for Engineers; NPTEL – Introduction to Soft Computing
